

In the Summary Of the Invention, Page 4, the first two full paragraphs read as follows:

In the subject invention, a bag with an interlocking sealable mouth is disposed within a foldable box with the upper portions of the bag secured to the inner sides of the box when the box is opened from its folded condition. Such a bag in one embodiment is called a ~~Ziplock®~~ ZIPLOCK® bag, which has a sealable mouth having interlocking lips and in which the interlocking members are joined together with a zipper mechanism. While not limited thereto, the subject bag will be referred to as a ~~Ziplock®~~ ZIPLOCK® bag, although other interlocking mouth bags without zipper mechanisms are within the scope of this invention. In one embodiment, the mouth of the bag is opened by means of the ~~Ziplock®~~ ZIPLOCK® zipper being moved to the open position, which then provides a mouth into which oil dripping from the oil pan may be directed during an oil change. The box itself is self-supporting and the bag is fixed to and contained completely within the box. Thus, the box with the internally carried bag opened at the top may be positioned underneath the oil pan and oil drain plug and the drained oil can flow into the bag without having to support the bag otherwise.

Upon the complete removal of the oil during the oil change operation, the ~~Ziplock®~~ ZIPLOCK® bag is sealed shut by movement of the zipper to the closed position, thus to seal the oil within the bag within the box. The box in one embodiment is provided with a cover which comes down over the mouth of the bag and the entire box and bag may be removed to a disposal site without leakage of the drained oil.

On Page 5, first paragraph, remove

“The oil thus collected may be removed through this capped spot at the bottom of the bag/box combination”

and substitute therefor:

– The oil thus collected may be removed through this capped spout at the bottom of the bag/box combination –

In the Brief Description Of the Drawings, Page 6, the description of Figure 2 should read:

Figure 2 is a diagrammatic illustration of one embodiment of the bag/box combination illustrating a ~~Ziplock®~~ ZIPLOCK® bag housed within a box, with the box in an open position;

In the Brief Description Of the Drawings, Page 7, the description of Figure 6 should read:

Figure 6 is a diagrammatic illustration of one embodiment of the bag/box combination of Figure 4, illustrating the opening of a ~~Ziplock®~~ ZIPLOCK® bag when the box has been expanded to its appropriate shape, showing the mouth of the bag being opened by moving the zipper to the right-hand-most position;

In the Detailed Description, Page 8, last paragraph, should read:

Referring to Figure 2, what will be seen is a diagrammatic illustration of one embodiment of the invention showing box 22 housing a ~~Ziplock®~~ ZIPLOCK® bag 20 therein, with the mouth 18 of bag 20 opened by virtue of sliding a zipper 28 to the right as illustrated. Note that box 20 may be provided with handles 22 to facilitate handling.

In the Detailed Description, Page 9, last paragraph should read:

It will be appreciated that the ~~Ziplock®~~ ZIPLOCK® bag can be secured to the upper portion of box 22 such as, for instance, by the adhesive tabs shown in Figure 9.

In the Detailed Description, Page 10, first paragraph should read:

Referring to Figure 7, once the ~~Ziplock®~~ ZIPLOCK® bag has been filled, box 22 may be closed by moving sides 42 and 44 inwardly as illustrated, which causes sides 46 and 48 to fold along fold lines 54 and 56.

In the Claims, please amend the Claims as follows:
